

Good morning!

National High School Coaches Association (NHSCA) developed a special website to assist all high school student athletes that are planning to attend college and possibly continue their athletic career. The website is free and has everything the student athlete needs to know from start to finish. The website addresses admissions procedures, financial aid, required state and federal forms, work study jobs, different types of scholarships, as well as NCAA Eligibility Center and required forms, NCAA recruiting rules, NCAA compliance, etc. There are also many tips that will assist the student athlete in dealing with college visits.

NHSCA realizes the burden of guiding the student athlete through this process falls on high school athletic directors, guidance counselors, principals, or coaches. Please take a few minutes to view our website titled Road Map to College. The website can be accessed at www.nhsca.com. If you approve, you can now simply direct all college bound student athletes at your school to this website that serves as a free one stop information center. We suggest that either you forward this email to your coaches and booster clubs, or print and make copies to hand them.

The mission of the NHSCA is to provide leadership and services to high school programs and their country. We heard from many coaches about the need and decided to provide the services. Please let us know if there are additional services the NHSCA could provide to help your coaches and student athletes.

Good luck on a successful year and please do not hesitate to contact us if you have any questions.

Sincerely,

Bobby Ferraro
Executive Director
