

Geometry Semester 1 Syllabus Fall 2023

Instructor

Mrs. Molivigny

Course Overview

In this course, you will be learning about different aspects of Geometry through direct instruction and inquiry-based learning. There will be times you will work collaboratively with classmates or independently. This is a learning environment which means that we are respectful to others throughout the learning process. Everyone learns in their own way, in their own time.

Quarter 1	Subject
Unit 1	Geometric Definitions
Unit 2	Lines and Angle Theorems
Unit 3	Triangle Congruence
Quarter 1 Final Exam	Unit 1 – Unit 3

Quarter 2	Subject
Unit 4	Triangle Theorems
Unit 5	Quadrilaterals
Unit 6	Transformations
Quarter 2 Final Exam	Unit 4 – Unit 6

Homework Policy

Homework. Homework. Homework. I understand your time outside of school is full of other activities that you want or need to do. I will always keep this in mind when creating homework assignments. This means I will limit the number of problems you are assigned. I will assign you problems that are important for you to practice and ask questions about. If you skip them, you won't know what will be assessed on quizzes and tests.

Turn In: To turn in your homework everyone will need to upload a picture of their work to the corresponding Schoology assignment. For paper copies, you will need to take a picture with your iPad of **all** pages and upload them to Schoology.

Due Dates: Every assignment will be due the next day your class meets, at midnight. What if you miss the due date? I understand sometimes you won't have time after school to get all your homework done or you will have questions. I will still accept assignments up to the day of the test. This doesn't mean waiting till the night before the test to complete your homework, that wouldn't benefit you. The sooner you turn in your homework the sooner I can grade it and give you feedback. Feedback is what you need to improve your math skills and will help you be successful in class.

Additional Information

Grades: The time to work on improving your grade is during class throughout the quarter and semester. The last week of the quarter is not the time to come and ask how to fix your grade. Each day is when you should be working towards learning and achieving your goal for the class. Below is the breakdown of how your grades are calculated each quarter:

Tests	65%
Homework	5%
Quizzes	10%
Quarter Final	20%

I am looking forward to a great semester with you! Feel free to reach out with any questions.
